

Documentation of Login / Sign up

Installation of Login / Sign up

Installation

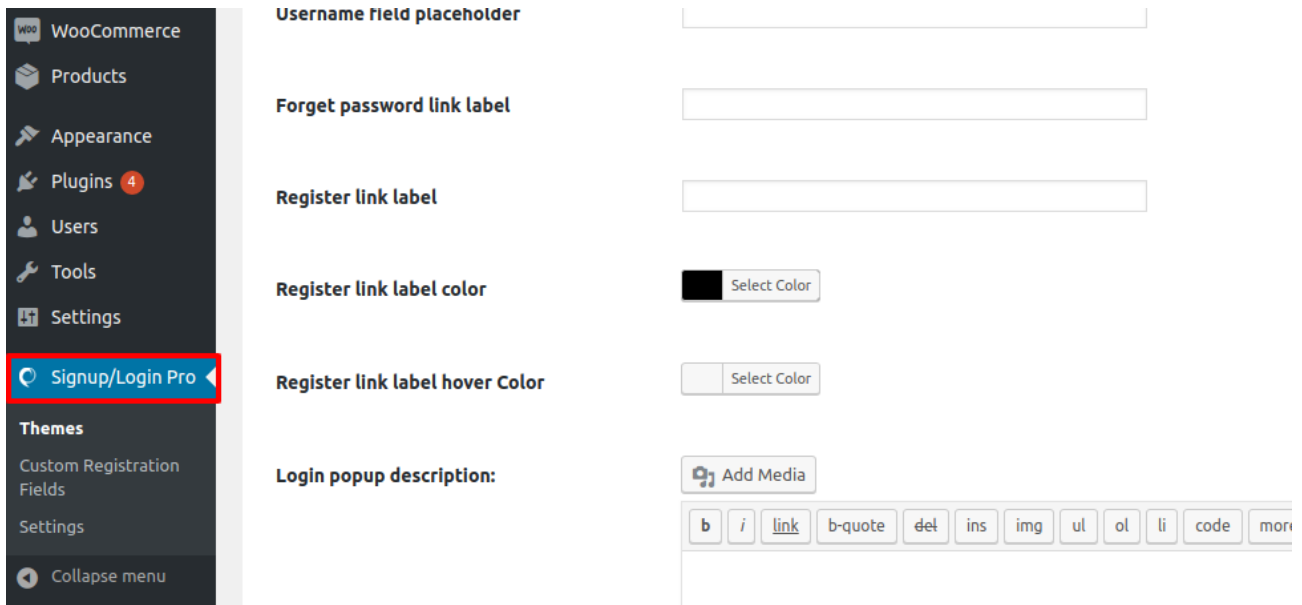

- ◆ Visit our website : <https://phoeniix.com/my-account>
- ◆ Login into your account.
- ◆ From your my account area , you can download the plugin zip file.
- ◆ After downloading the plugin , Go to your WordPress admin panel, and then to Plugins. Click on "Add New" and then upload the zip file of the plugin using the "**Upload Plugin**" button you can find on top of the screen.

NOTE : If you are using free version then kindly deactivate it and then activate the premium version.

Activation

Once you have uploaded the plugin, activate your plugin in Plugins → Installed plugins.

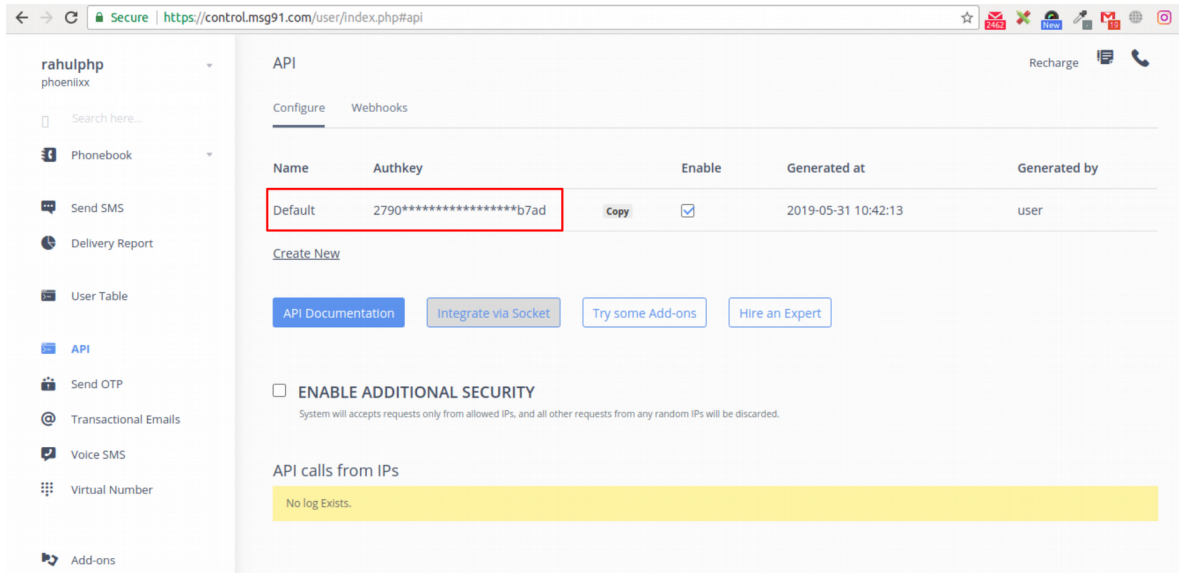

If it has been activated correctly, plugin control panel is available in the tab **Signup/Login Pro**

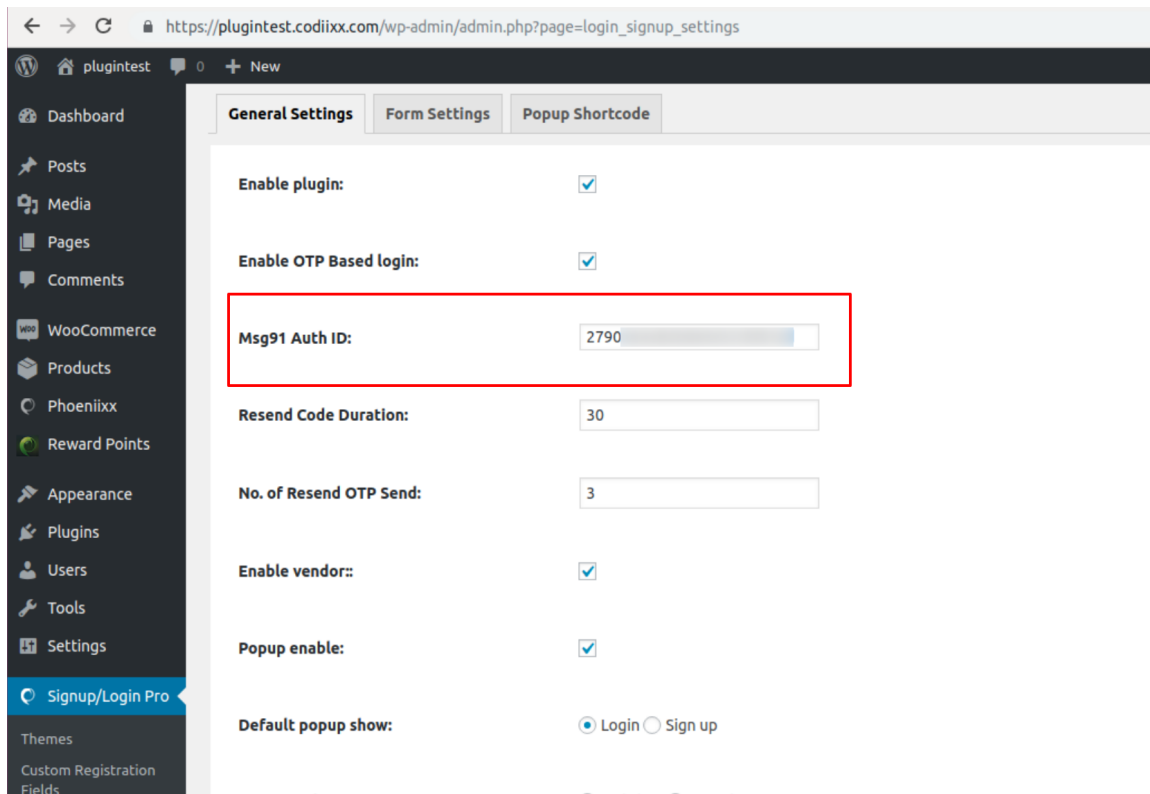

The screenshot shows the WordPress admin dashboard with the 'Signup/Login Pro' plugin settings page. The left sidebar menu is visible, with 'Signup/Login Pro' highlighted in a red box. The main content area displays various settings for the plugin, including text input fields for 'Username field placeholder', 'Forget password link label', and 'Register link label'. There are also color selection buttons for 'Register link label color' and 'Register link label hover color'. The 'Login popup description' field includes an 'Add Media' button and a rich text editor toolbar with options like bold, italic, link, b-quote, del, ins, img, ul, ol, li, code, and more.

How to add SMS API key for OTP functionality?

- ◆ Visit this link : <https://msg91.com/>
- ◆ Click on the **“Sign up”** shows at the right side on the top. Register here to get the sms api key.
- ◆ Once you successfully registered then you will get the key. See the image below.
- ◆ **To show OTP functionality , enable it from the plugin backend settings.**

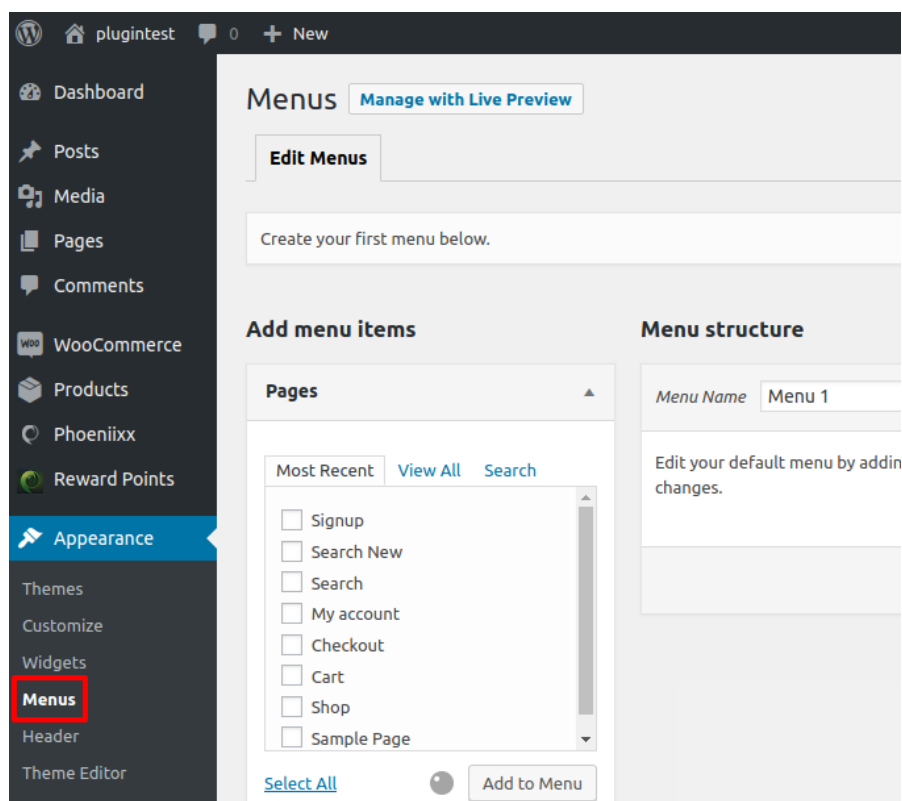

- ◆ Copy the Authkey and paste it. See the image below.

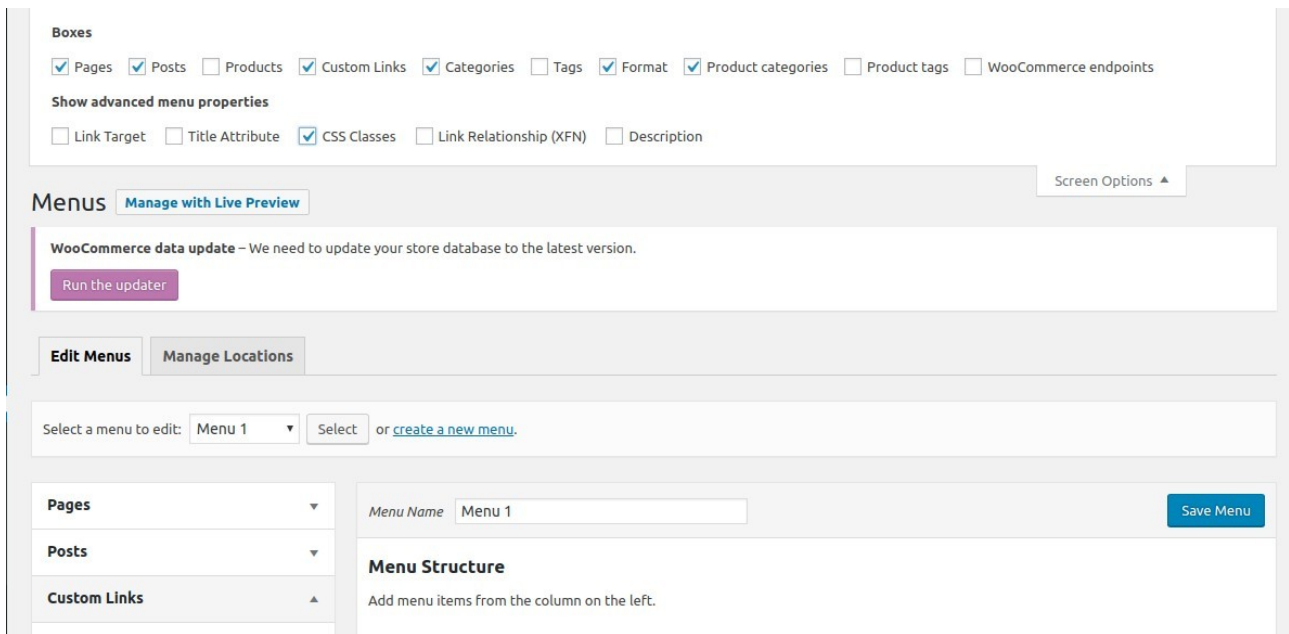

How to add the login / sign up button on menu?

By using these classes you can add it in the Menu.

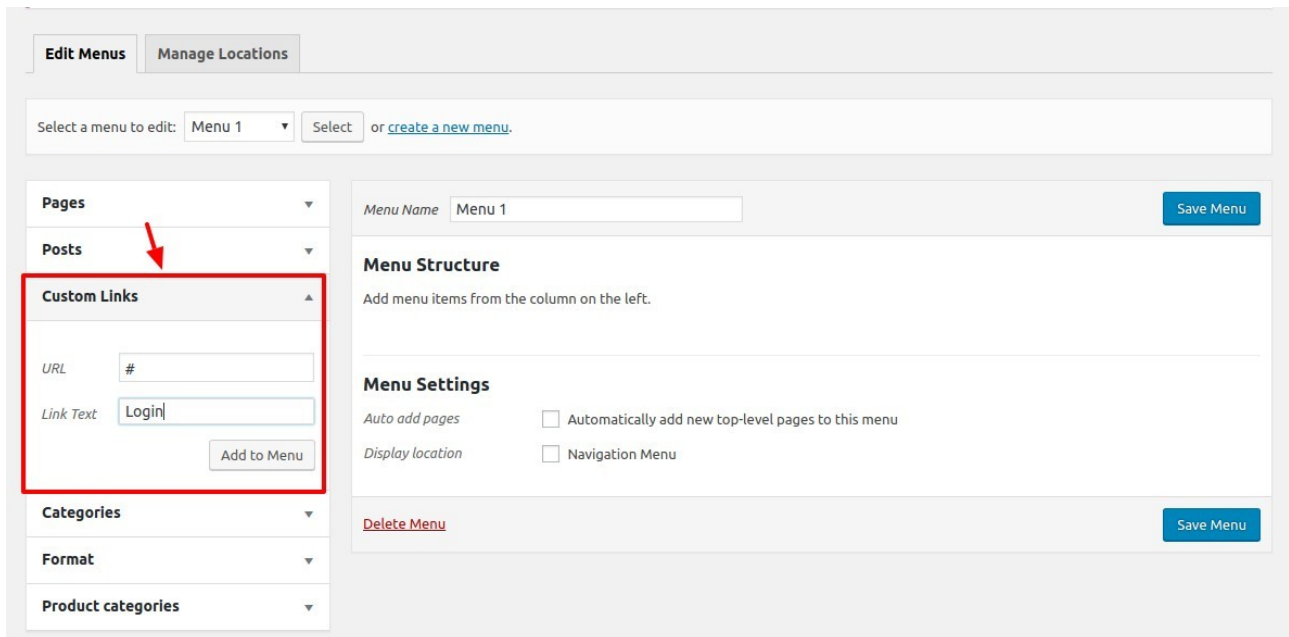

- **Popup Login Class - phoen-login-popup-open**
 - **Popup signup Class - phoen-signup-popup-open**
 - **Popup For Both Login & signup Class - phoen-login-signup-popup-open**
- ◆ Go to the Appearance tab and under that tab click on menus.

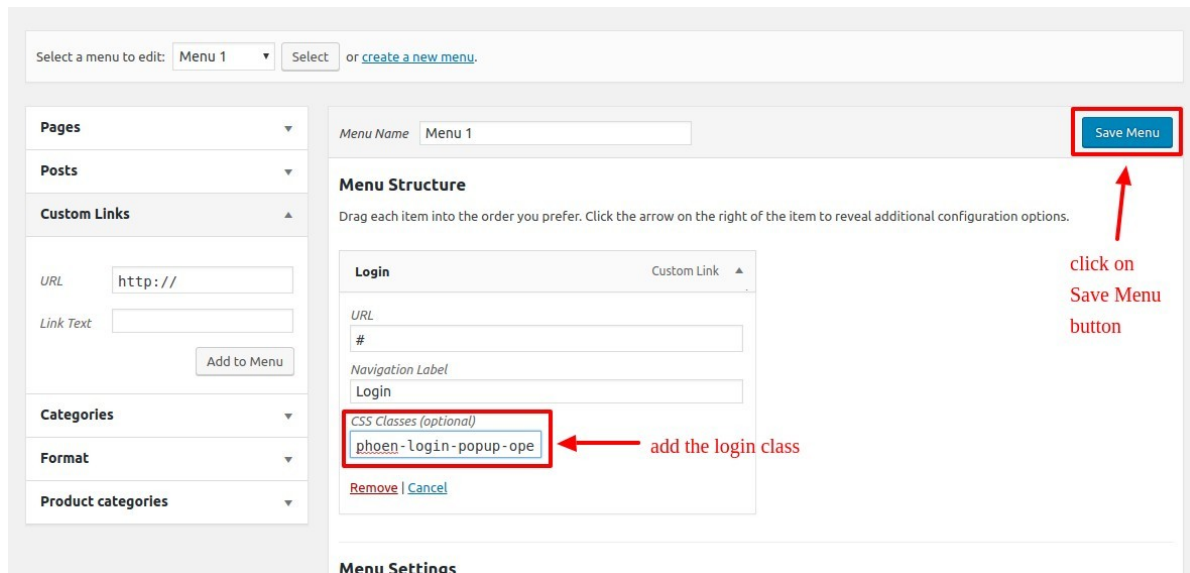

- ◆ Then at the top enable CSS class option.

- ◆ After that click on Custom Link option and then give url “#” and Name and then click on add menu button.

- ◆ After adding the menu then add the Login CSS class.

You can add the shortcodes on a page also. Below are the shortcodes which you can add on a page.

- Short code for Login form - [Isphe-login-form]
- Short code for Signup form - [Isphe-signup-form]
- Short code for both login and register form - [Isphe-header]

How to add Login / Signup button in Header?

- ◆ Add this shortcode : `<?php echo do_shortcode('[Isphe-header]'); ?>` in the header.php file.

GENERAL OPTIONS

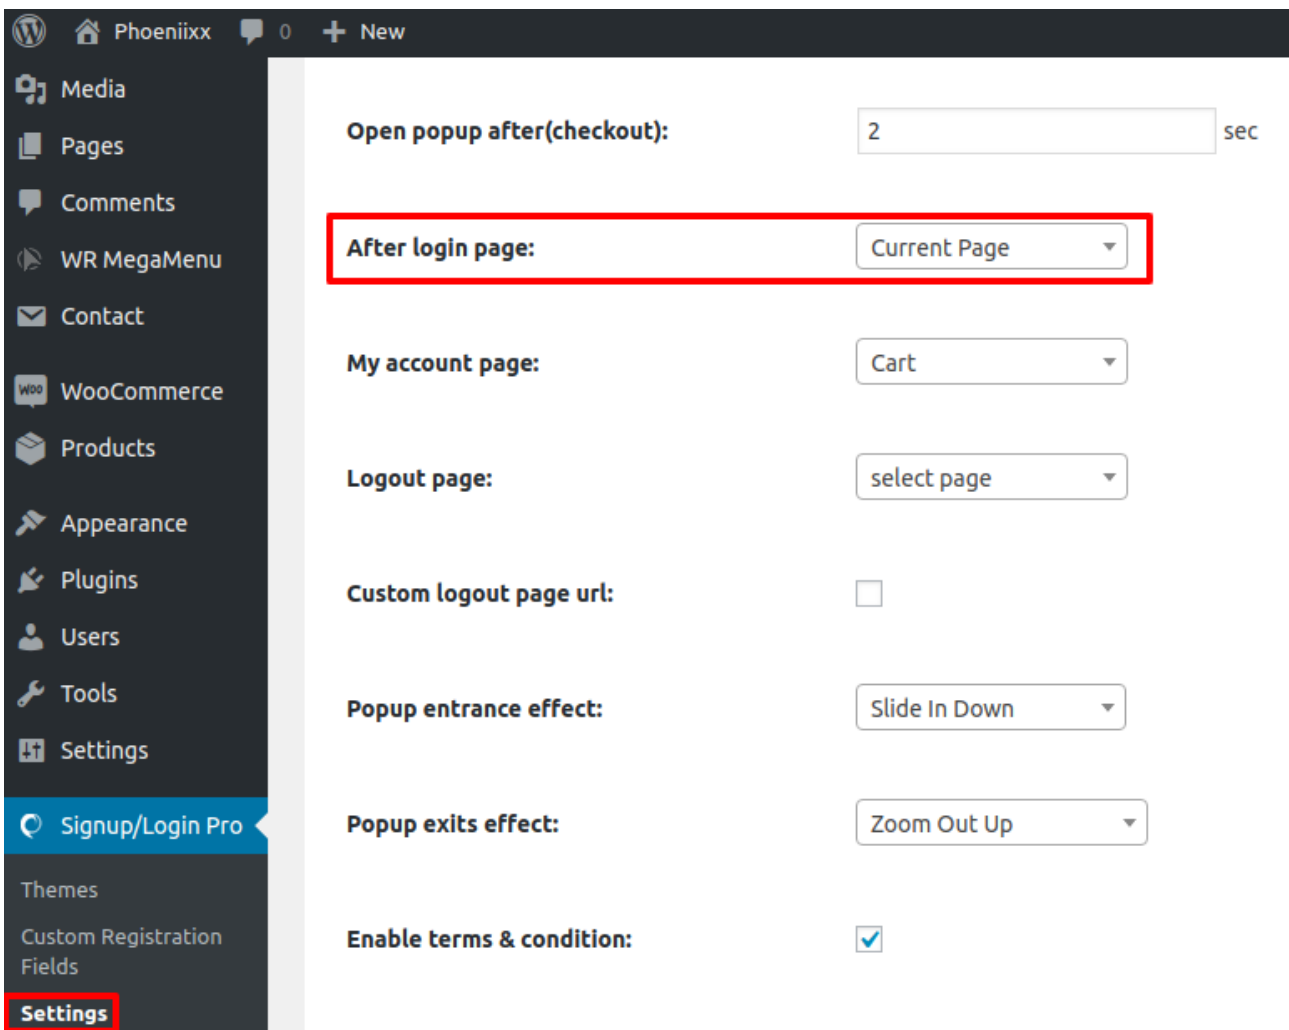

Redirect user to any page after login / sign up

This feature allows a new or existing user to directly access 'My Account' Page or any other page as per your requirement, as soon as he/she Signs Up or Logs into his/her account on your website.

From the dropdown list you can select the page.

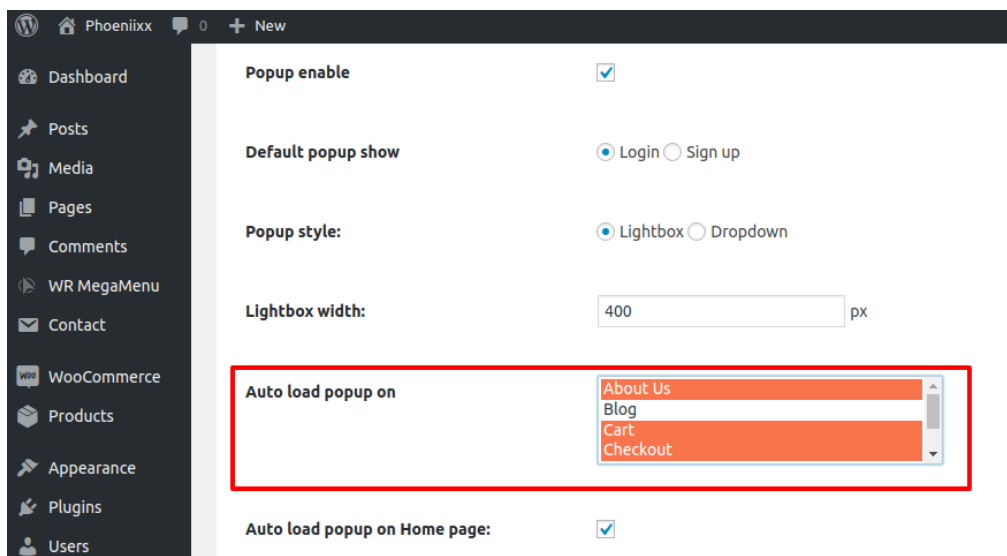

After login page:

If you want the user to redirect to the current page after login / register. **Select the option “Current Page “highlighted in the screenshot.**

Add Auto Load Pop up on any page

- ◆ You could let the popup load automatically on any page you want and could set the desired number of seconds after which you require the popup to appear on the loaded page.
- ◆ You can select multiple pages from the list to show the pop up.

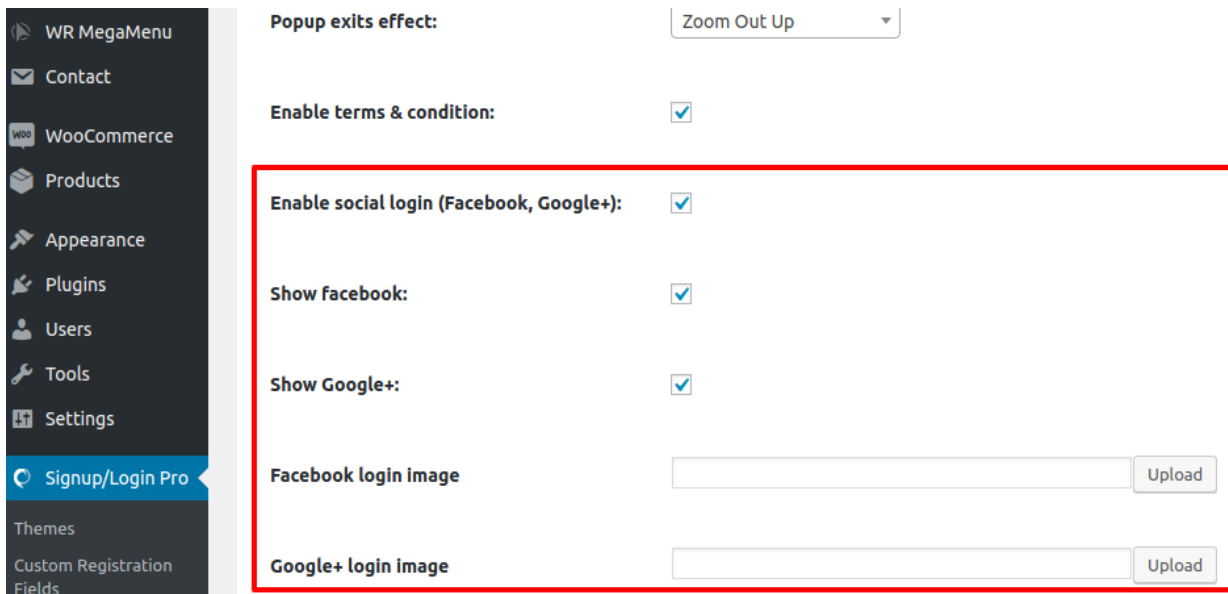

Enable/Disable Terms & Conditions

- ◆ You could Enable or Disable T&C on Registration Page.

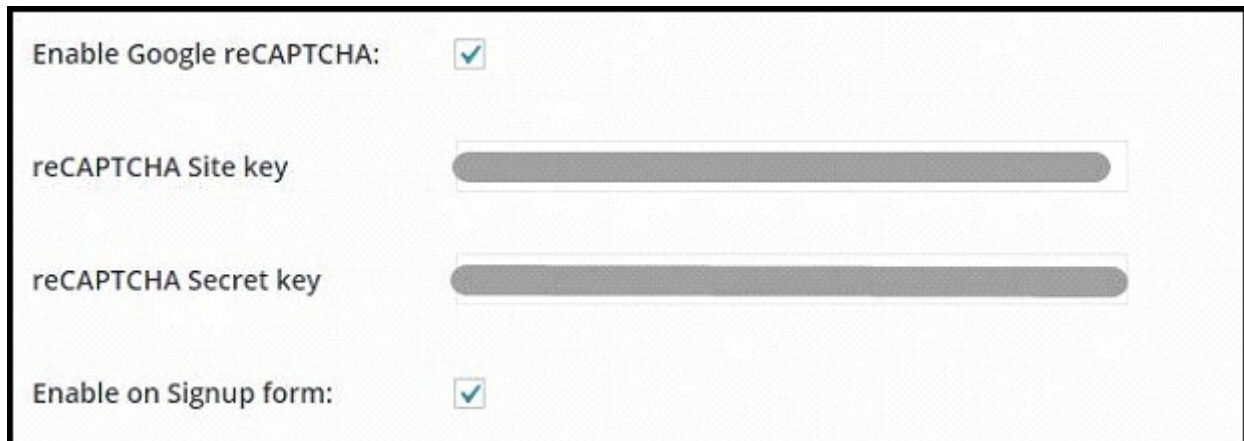

Integrate Social Login into Popup.

- ◆ To integrate this functionality , you need to download this plugin : <https://wordpress.org/plugins/social-login-lite-for-woocommerce/>
- ◆ With this feature, you could enable social login through Popup/Pages and set the Social Account Layout either as 'Up' or as 'down'. You could upload FB and Google+ icon images as well.

Add 'Google Recaptcha' at the time of Signup.

- ◆ This option allows you to place 'Google Recaptcha' feature before a new User Signs Up. The feature lets you ensure that the new user is a human and not a robot.
- ◆ Recaptcha will show only on Signup Form.

The screenshot shows a configuration panel for Google reCAPTCHA. It includes the following elements:

- Enable Google reCAPTCHA:** A checkbox that is checked.
- reCAPTCHA Site key:** A text input field containing a blurred site key.
- reCAPTCHA Secret key:** A text input field containing a blurred secret key.
- Enable on Signup form:** A checkbox that is checked.

Set Popup Layout

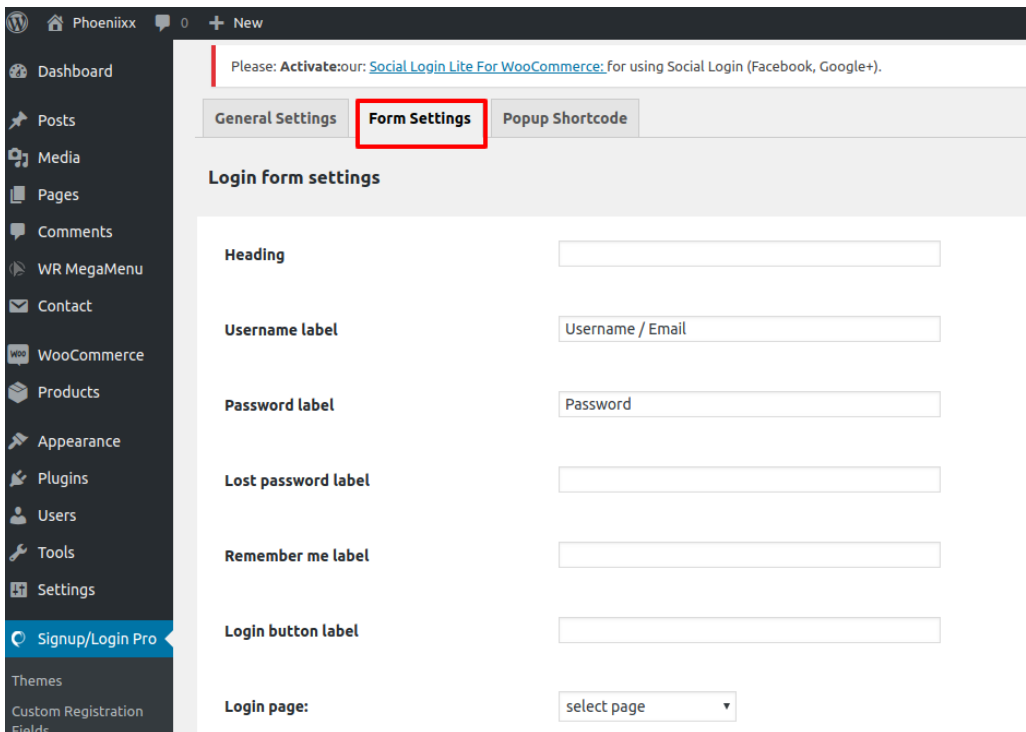

- ◆ The plugin lets you set the Popup Layout whenever you require to do so. You are provided with three Layout choices, out of which you could select one.

The screenshot shows a selection interface for the popup layout. It features the label "Layout type" on the left and three radio button options on the right, each accompanied by a small icon representing a different layout style. The first radio button is selected.

Customize Labels in Login Form, Register Form.

- ◆ In the **Form Settings** tab you will find the options to customize your login / signup form.
- ◆ For Login Form you could write your own 'Heading', 'Username' Label, 'Password' Label, 'Lost Password' Label, 'Remember Me' Label & 'Login Button' Label.
- ◆ And for Register Form, you could write your own 'Heading' Label, 'Password' Label, 'Email' Label & 'Register Button' Label, Can enable/disable 'First Name Field', 'Last name Field', and 'Confirm Password Field'.

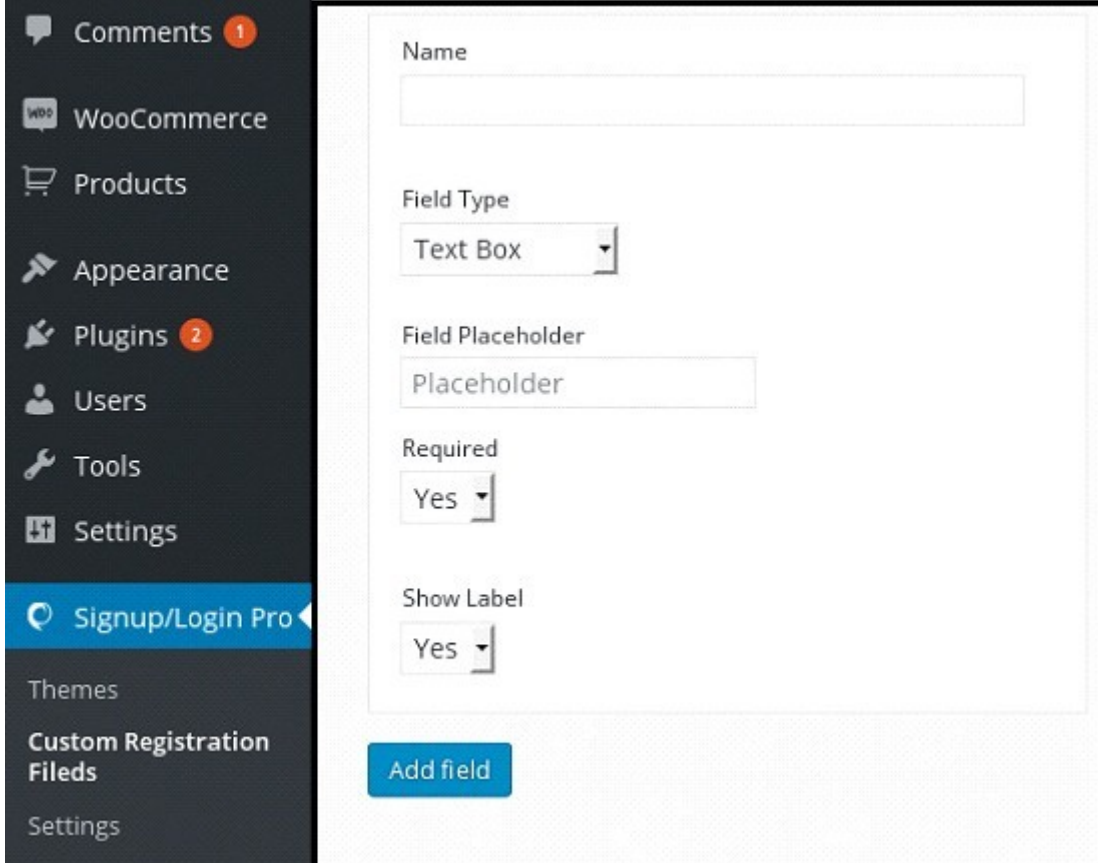

WordPress admin dashboard showing the 'Form Settings' tab for the 'Signup/Login Pro' plugin. The 'Form Settings' tab is highlighted with a red box. The settings include:

- Heading:
- Username label:
- Password label:
- Lost password label:
- Remember me label:
- Login button label:
- Login page:

Add Custom Registration Field.

- ◆ You can create your own custom registration fields like name, user name, date of birth, address, contact number by using field types like text box, text area, drop down, date, checkbox, radio button.
- ◆ You can make the fields mandatory, can show label filled in the field placeholder.

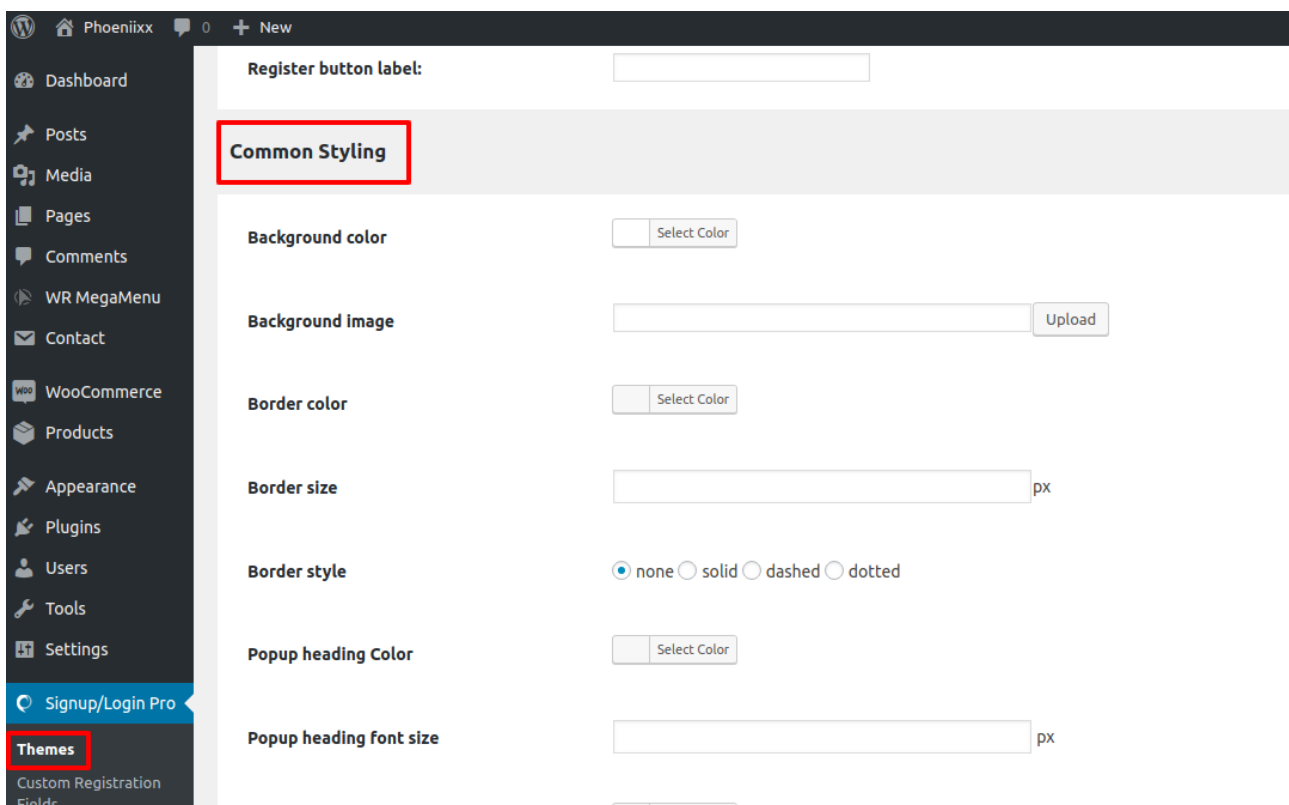

The screenshot displays the WordPress admin dashboard with the 'Signup/Login Pro' plugin settings open. The left sidebar contains navigation options: Comments (1), WooCommerce, Products, Appearance, Plugins (2), Users, Tools, Settings, Signup/Login Pro (selected), Themes, Custom Registration Fields, and Settings. The main content area shows the 'Add field' form with the following fields:
