

Documentation Of Advanced Sequential Order Number for Woocommerce

Installation of Advanced Sequential Order Number for Woocommerce

Installation

- ◆ Go to your WordPress admin panel, and then to Plugins. Click on "Add New" and then upload the zip file of the plugin using the "Upload Plugin" button you can find on top of the screen.
- ◆ For the plugin to work as it should, WooCommerce plugin has to be installed and enabled.

Activation

- ◆ Once you have uploaded the plugin, activate your plugin in Plugins → Installed plugins.
If it has been activated correctly, plugin control panel is available in the tab **Woocommerce** → **settings** → **Order Number**

A screenshot of the WordPress admin dashboard. The left sidebar shows the navigation menu with "Settings" highlighted. The main content area shows the "Order Number" settings page, which is highlighted with a red box and a red arrow. The settings include "Enable Plugin" (checked), "Counter Type" (set to "Random"), and "Order Number Format" (set to "{prefix}{suffix}{order_number}"). A message at the top indicates that geolocation has not been configured.

Geolocation has not been configured.

You must enter a valid license key on the [MaxMind integration settings page](#) in order to use the geolocation service. If you do not need geolocation for the default customer location on the [general settings page](#).

Order Number

Enable Plugin Enable

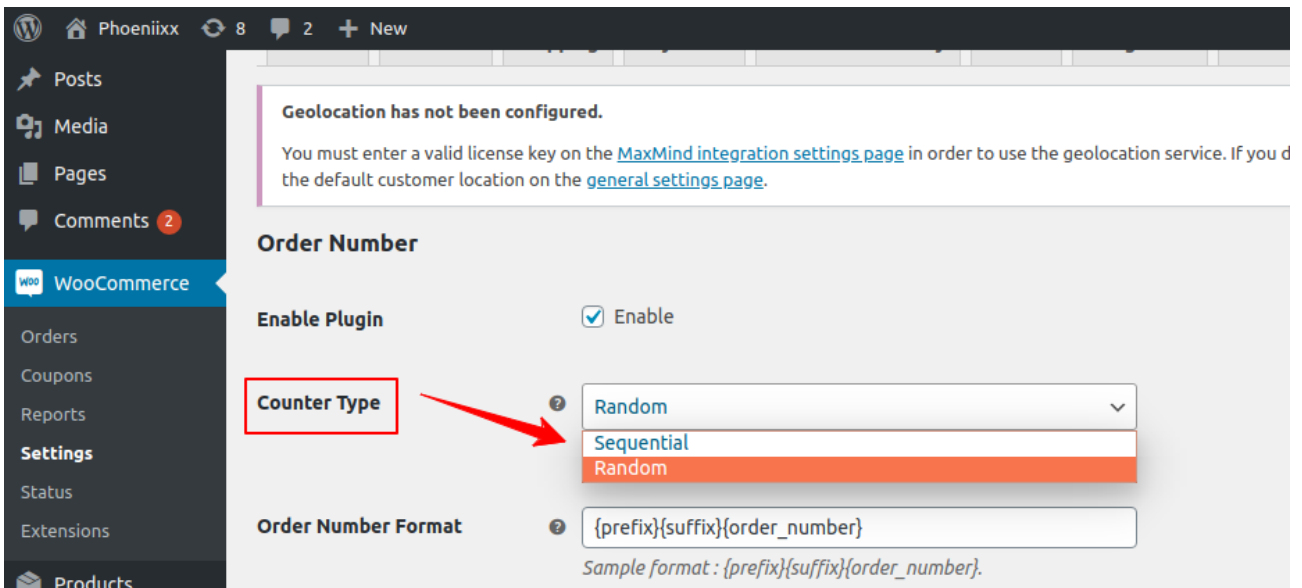

Counter Type Choose counter type.

Order Number Format Sample format: {prefix}{suffix}{order_number}.

General Settings

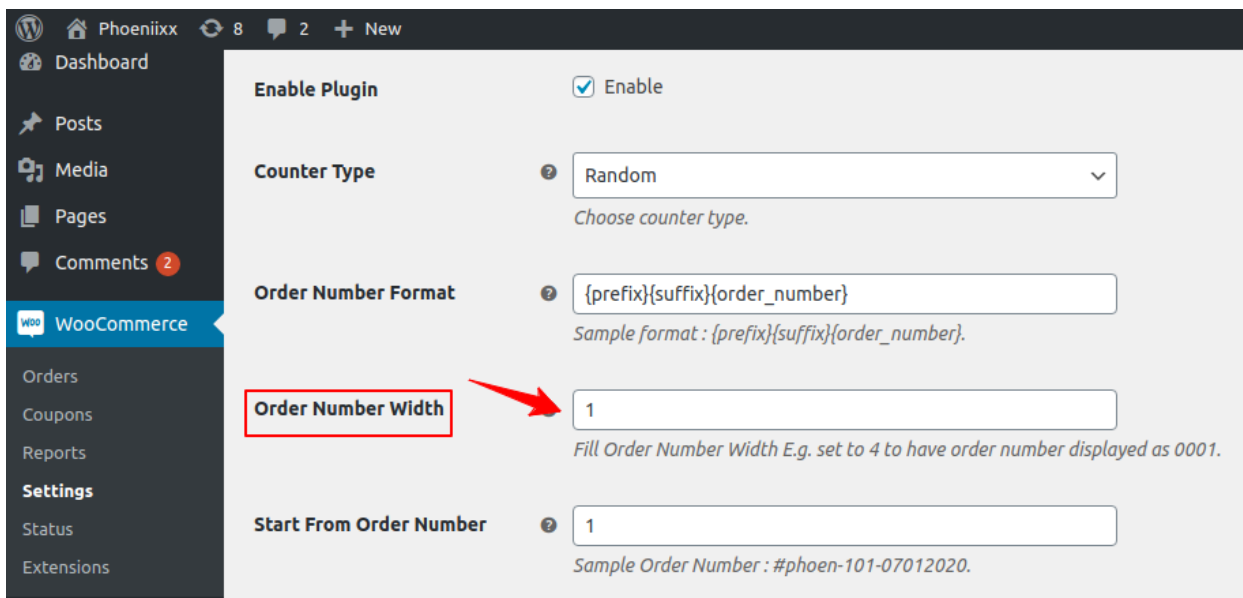

Counter Type

- ◆ There are 2 types of counter type available - **Sequential or Random**
- ◆ In sequential type, the new orders will be shown in a sequence. For Example, 0001, 0002 etc.
- ◆ Whereas in Random counter type, it will show in unsorted manner. For Example, 2345, 5678 etc.

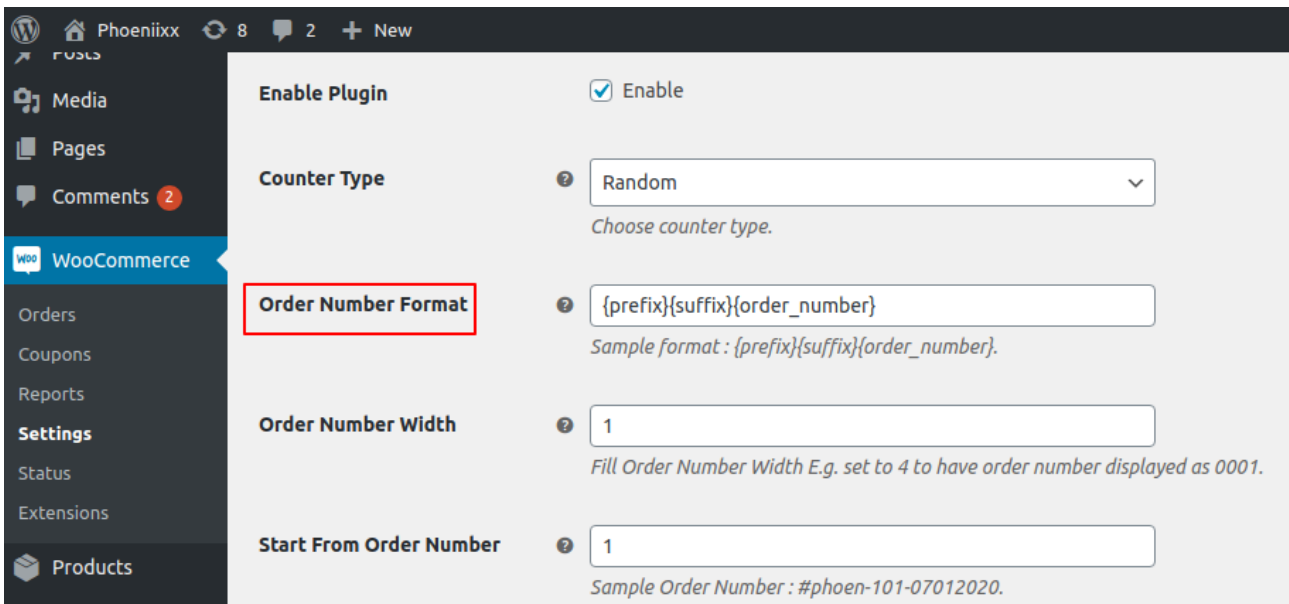

Order Number Width

- ◆ This is the order number width. When you set the width to 4 then it will display the order number as 0001 instead of 1.

Order Number Format

- ◆ There is a predefined format to set the order number prefix, suffix.
- ◆ **{prefix}{suffix}{order_number}**

- ◆ The fields are given to add/edit the prefix/suffix text for order number.
